

**MODULO DI REGISTRAZIONE DI UN GOPHER SERVER,
DA COMPILARE E INVIARE VIA E-MAIL A IT-DIR@NIS.GARR.IT**

(Giuseppe Romano - GARR-NIS, Pisa)

Gopher-title: the long gopher name
Host: the host which manages the gopher server
Organization: the name of the Organization which maintains
the gopher server
Organization-u: the name of the Organization unit which
maintains the gopher server.
address: the address of the Organization/Organization unit
contact: the contact persons.
date: the date of last update
description: the database description
note: some useful notes to look the gopher server
link: the cold link commands to link the gopher server

Esempio di Registrazione di un Gopher Server

Gopher-title: GARR Network Information Service Gopher
Host: gopher.nis.garr.it
Organization: Consiglio Nazionale delle Ricerche
Organization-u: CNUCE
address: Via S. Maria 36 - 56126 Pisa Italy
contact: Giuseppe A. Romano
Tel: +39 50 593248
Fax: +39 50 589354
e-mail: romano@nis.garr.it
date: november 1993.
description: This is the gopher-server of the GARR Network Information Service
(NIS).

The GARR Network Information Service (GARR-NIS) is located at CNUCE-CNR in
Pisa, which currently provides it with all the necessary resources:
hardware, software, financing, personnel, etc.

The GARR-NIS is running the IT top-level domain name server and the c=IT X.500
DSA.

GARR NIS is the reference-point for various registration procedures (for organisations,
networks, domains, persons, etc.) required to access to the GARR network and to
international networks.

GARR NIS main functions are:

- 1) to be the reference-point for various registration procedures (for organisations,
networks, domains, persons, etc.) required to access to the GARR network and to
international networks.

- 2) to define procedures and registration templates, taking into account the information requested by other European and American NISes (GSI-NIC, NNSC, RIPE-NCC, EASI- NIS, etc.), in accordance with the Guidelines established by GARR and collaborating with the international networks managers.
- 3) to acquire network information and to maintain databases and directory services in order to make such information accessible via the network.
- 4) to provide the Internet DNS and X.500 DSA services at the national root level, and to coordinate their distributed management at the national level.
- 5) to publicise, duplicate or improve the accessibility (through directory and/or information discovery systems) to useful network information provided by other NISes or information-servers.
- 6) to carry out promotional activities spreading information on the GARR network and NIS: periodic reports, announcements, news about workshops and seminars, etc.

GARR-NIS is reachable at the following address: via Internet at
INFO@NIS.GARR.IT
and via X.400 at

c=it;admd=garr;prmd=garr;o=nis;s=info

For more detail about the GARR Network please look in the folder
Information on the GARR Network

If you have questions or comments, you can get in contact the GARR-NIS's Gopher development team by sending e-mail to:
romano@nis.garr.it or most general *info@nis.garr.it*
