Fifteen oceanographic cruises were organized in the western and central Mediterranean basins between October 2007 and October 2020 (see the table) by the Italian National Research Council (CNR) and the acquisition of 661 hydrological vertical profiles. The cruise carried out in 2015 is part of another database ([Ribotti et al., 2019a](#)) while in 2016 no cruise was planned and in 2019 it was cancelled due to bad weather conditions. Data of conductivity (SBE-4 sensor, resolution of 3×10^{-4} S/m), temperature (SBE-3/F thermometer, resolution of 0.00015 °C/bit at -1 °C or 0.00018 °C/bit at 31 °C), dissolved oxygen (DO; SBE-43 polarographic membrane sensor with a range of 120% of surface saturation and an accuracy of ±2% of saturation), Chlorophyll-a fluorescence (Chl-a; Sea Tech Inc. fluorometer with energy emitted by the flash lamp of 0.25 J for flash, temperature range 0 ° – 25 °C, resolution 0.15 mg/l) reported as Relative Fluorescence Unit. A Chelsea Aqua 3 fluorometer has been used, while no fluorescence data were during the two cruises Bonifacio2010, -Sic and -Cor. Turbidity was acquired just during Bonifacio2011 by a Seapoint, and by a WET Labs ECO-NTU during Piattaorme2018 and Ichnussa2020. The pH/Redox sensor (SBE27) was available just during the cruise Piattaorme2018 but calibrated one year before. Pre-cruise and post-cruise calibrations of first and redundant sensors of temperature, salinity and dissolved oxygen were performed by CNR technicians at the NATO-CMRE Center in La Spezia (Italy). After acquisition data were quality checked and processed by the Sea-Bird Seasoft software, and the coarse errors corrected. On board the R/V Urania and R/V Minerva Uno, salinity was checked against the onboard analyses of water, sampled at pre-defined depths, by a Guildline-Autosal salinometer, while on the other vessels all samples were analyzed once back at CNR. The same for dissolved oxygen, checked against Winkler titration analyses onboard. This post-cruise calibration was not done on data acquired during the cruise Piattaorme2018. Chl-a, pH and turbidity, where available, data were not calibrated. These procedures of quality assurance and check are widely described in [Ribotti et al. \(2020\)](#). Furthermore, in the framework of the MEDESS4MS project (see info on <https://keep.eu/>), on 17 and 21 May 2014 two daily cruises, SeriousGame2014-1 and -2, were jointly held by the CNR in Oristano with the CNR in Ancona and the Italian Coast Guard. The two surveys covered, with 45 casts each, about 880 km² of shelf on a 5 x 5 km spatial grid in latitude and longitude of an area located north of the Elba island in the Tuscany Archipelago, northern Tyrrhenian Sea. The CTD probe was a Seabird

SBE19 plus V2 equipped with sensors of pressure, temperature, conductivity, SBE 63 for dissolved oxygen, WET-Lab FLNTU for turbidity (NTU) and Chlorophyll (ug/l) and, just during the second cruise, a Turner Cyclops sensor for the Chromophoric Dissolved Organic Matter (CDOM in ppb QS – Quinine Sulfate). The probe was calibrated on January 29th 2013 but not before and after the two cruises, for what is known, so data were just quality checked and processed by the Sea-Bird Seasoft software, and the coarse errors corrected. This database is integrated with other two covering the period 2000–2006 for western to eastern Mediterranean ([Ribotti et al., 2019_b](#), [Ribotti et al., 2019_c](#)). The data set is provided per cruise as Ocean Data View (ODV, Schlitzer, 2022. Ocean Data View. <https://odv.awi.de>) Spreadsheet files in TXT format where missing data values are set to -1.e10.

List of cruises organized in the period 2007–2020 with number of casts, research vessels used and areas interested (with at least two casts)

Cruise name	Start cruise	End cruise	# casts	Vessel	Area
MedCO07	05/10/2007	29/10/2007	85	Urania	East Ionian, Sicily Strait, Sardinia Channel, Tyrrhenian Sea, Ligurian Sea, Catalan Sea, Algerian basin
MedCO08	03/11/2008	24/11/2008	63	Urania	Gibraltar Strait, Alboran Sea, Algerian basin, Sardinia & Corsica channels
Sicily09	30/10/2009	23/11/2009	109	Urania	channels of Sardinia, Sicily, Corsica, Bonifacio Strait
Bonifacio2010-Cor	12/03/2010	22/03/2020	28	Maria Grazia	Bonifacio Strait, Corsica Channel
Bonifacio2010-Sic	23/11/2010	09/12/2010	22	Urania	Sardinia Channel, Sicily Strait
Bonifacio2011	09/11/2011	23/11/2011	19	Urania	Algero-Provencal basin, Tyrrhenian Sea, Sardinia Channel
Ichnussa2012	11/01/2012	27/01/2012	36	Urania	Algerian basin, Sardinia Channel, Tyrrhenian Sea
Ichnussa2013	15/10/2013	29/10/2013	44	Urania	East Ionian, Sicily Strait, Sardinia & Corsica channels, Tyrrhenian Sea, Algerian basin
Ichnussa2014	13/11/2014	01/12/2014	68	Urania	Tyrrhenian Sea, Sardinia & Corsica channels, Ligurian Sea, Algero-Provencal basin
SeriousGame2014	17/05/2014 (1) 21/05/2014 (2)	18/05/2014 21/05/2014	45 45	CP 406 A. Scialoja	North Tyrrhenian Sea
Ichnussa2017	23/10/2017	09/11/2017	37	Minerva Uno	channels of Sardinia and Corsica, Sicily Strait
Piattaforme2018	18/05/2018	03/06/2018	29	G. Dallaporta	Sicily Channel
Ichnussa2018	20/09/2018	03/10/2018	10	G. Dallaporta	Sicily Strait
Ichnussa2020	08/10/2020	10/10/2020	21	G. Dallaporta	North-Northeast Sardinia

UTILISATION

These data are published without any warranty: the user assumes all risk arising from his/her use of these data. These data are intended to be quality controlled, but it is possible that they contain errors. It is the unique responsibility of the user to assess if the data are appropriate for his/her use, and to interpret them accordingly. We welcome users to ask questions and report problems to the contact addresses listed in the data files.

ACKNOWLEDGEMENTS

The data used in this work have been collected in the framework of several national and European projects, i.e. the Italian ASI project PRIMI (Progetto Pilota Inquinamento Marino da Idrocarburi), the EU projects MyOcean (contract 218812) and MyOcean2 (contract 283367), the MED programme project MEDESS4MS (Mediterranean Decision Support System for Marine Safety; agreement MED2S-MED11-01), the Italian MATTM project SOS-BONIFACIO (prot. DPN-2009-0001027 of 20/01/2009), the Italian MIUR project PON TESSA (Sviluppo di TEcnologie per la 'Situational Sea Awareness', agreement PONO1_02823), the Italian MIUR project RITMARE (La Ricerca ITaliana per il MARE), the EU COMMON SENSE contract n. 614155), the Italian MATTM project SOS-Piattaforme & Impatti offshore (Reg. Uff. U. 0000939.17-01-2017), 2014 – 2020 INTERREG V-A Italy – France (Maritime) project SICOMAR plus (Transborder System for Safety at Sea against the Risks of Navigation and for the Protection of the Marine Environment plus). We thank captains and crews on R/V Urania, R/V Maria Grazia, R/V Minerva Uno and CP-406 Antonio Scialoja for their essential support on board, then Dr Paschini Ezio and Mr Penna Pierluigi from CNR in Ancona for their support during the cruises SeriousGame2014.
