

# Use of vocabularies for metadata curation and quality assessment in Social Sciences and Humanities

27-28 March 2023

[Centre Marc Bloch](#)

Friedrichstraße 191, D-10117 Berlin, Germany

Following the Multilingual Vocabularies for SSH event<sup>1</sup>, this TRIPLE training session, organized by DARIAH ERIC, aims at providing insights into the use of “topical vocabularies” and their use in metadata curation and quality assessment in the Social Sciences and Humanities (in the EOSC context).

Because of the fragmented landscape of semantic artefacts in Social Sciences and Humanities, it is proven challenging to ensure good discoverability/findability of the resources. Nevertheless, recent EOSC-related initiatives working towards a collaborative SSH vocabulary infrastructure, automatization of semantic annotation tasks - such as the ones performed in GoTriple - and metadata curation complemented by human expertise contribute to fostering exchanges between practitioners and building a common infrastructure.
