

Message from the Demo Chairs

MDM 2024

The IEEE MDM series of conferences, since its debut in 1999, has established itself as a prestigious forum for the exchange of innovative and significant research results in mobile data management. The Demonstration track offers an opportunity for researchers to showcase cutting-edge and innovative research and development outcomes and novel applications in the area of mobile data management.

IEEE MDM 2024 Demonstration track received 10 submissions. Each submission was reviewed by a minimum of two Demonstration Track Program Committee members. Finally, six high-quality demo papers were selected for presentation and demonstration at the conference. The accepted demos cover a wide range of topics in mobile data management from data analytics, mobile applications, data management, visualization, machine learning and artificial intelligence related to mobile computing.

We would like to thank all the authors for their contributions to IEEE MDM 2024 demonstration track. We are confident that the demonstrations will contribute both to the MDM 2024 in Brussels, as well as to the MDM community broadly.

We are also thankful to our excellent IEEE MDM 2024 Demonstration Track Program Committee members for their dedication and diligence in providing constructive, insightful and timely comments which have contributed to a high-quality Demonstration Track program. Finally, we would like to thank the MDM 2024 organizers for their valuable guidance along the way.

Luca Pappalardo, *ISTI-CNR, Italy*

Panagiotis Tampakis, *University of Southern Denmark, Denmark*

Prem Prakash Jayaraman, *Swinburne University of Technology, Australia*
