The handheld terminal has been developed for controlling, monitoring and programming industrial machinery and robots. It is very compact and light weighted with less than 700 grams and compact dimensions of 22 x 12.5 x 4.8 cm. The terminal has also been designed with advanced ergonomic features while adhering to the strictest safety standards, giving the operator a quick and easy access to numerous HMI and control functions. It has a soft touch keyboard and a 5" color touch screen providing clear and intuitive navigation. Besides, the absence of wires grants users with greater freedom of movement, even in the most extreme working conditions.
